***“I was going to let my daughter tell you this, but I can’t wait! The only prep she did between the first time she took the ACT and the ACT she took in December was your class. She went from a 21 in reading to a 29. That says volumes about what your class did for her. She was literally screaming when she got her score. I had to run into her room because I thought something was wrong! Kudos to Advanced Reading Concepts on a job well done!” RM***
